HOLDERS for wafers

Special Plastic Module for
semiconductor industry

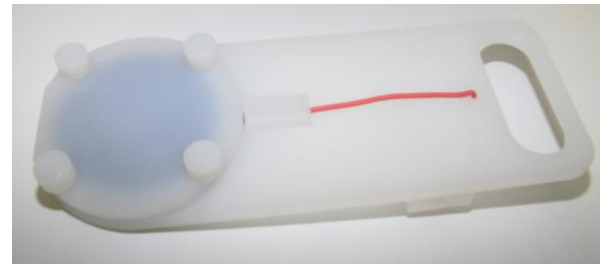

HOLDERS

Holder's type

S.P.M. has developed during the years many Holders versions in order to satisfy every customer's requirements. We realize custom wafer holders for different dimension wafers, masks and other supports, special types for electroplating and jig versions. They can be realized in various materials like PTFE or PVDF. The holders can be realized for single wafer or for double wafer in sandwich version.

S.P.M. s.r.l.
